I wanted to share a positive development in regards to expanding health services for veterans in Northern California. This week I participated in the ground breaking of the Yuba-Sutter Veterans Affairs Outpatient Clinic. Located on 431 Plumas Boulevard in Yuba City, it will be operated by the U.S. Department of Veterans Affairs (VA) and provide a broad range of health services. This clinic will be of great help to many North State veterans, sparing many the time and expense of driving long distances to receive primary medical care. Veterans will have better access to preventative care and those with chronic health problems will have easier follow-ups. I will monitor the construction of this facility, and I look forward to its grand opening, which should occur before the end of the year.
